

ASHUTOSH SONI

SENIOR SOFTWARE ENGINEER

☎ (+91) 9149262609 | ✉ viknat1994@gmail.com | [in](#) [LinkedIn](#)

PROFILE SUMMARY

- **Senior Software Engineer / Lead developer** with **8+ years** of experience developing **scalable, cloud-native** applications using **Node.js**, SQL/NoSQL databases (PostgreSQL, MongoDB), React.js, Python, and microservices architectures across high-growth technology platforms.
- Scaled systems supporting **5M+ users** and high-concurrency workloads
- Designed and implemented distributed backend systems and event-driven architectures on AWS, leveraging Kafka, Docker, Kubernetes, Redis, and cloud-native services to support millions of users and high-throughput workloads.
- Built and maintained **scalable microservices, RESTful APIs, GraphQL** services, and real-time data processing platforms, applying object-oriented design principles, data structures, algorithms, and performance optimization techniques.
- Developed and optimized large-scale data ingestion, transformation, and analytics pipelines, including CDC-based architectures (**PostgreSQL → Kafka → ClickHouse**) enabling near real-time business intelligence and operational insights.
- Extensive experience with SQL and NoSQL technologies including PostgreSQL, MongoDB, Elasticsearch, Redis, and ClickHouse, delivering highly available and low-latency applications.
- Collaborated within **Agile/Scrum environments**, participating in sprint planning, backlog grooming, code reviews, cross-functional delivery, and continuous improvement initiatives throughout the software development lifecycle.
- Leveraged modern **AI-powered** development tools, including ChatGPT, Claude, and Cursor to improve engineering productivity, accelerate development cycles, enhance code quality, and streamline solution delivery.
- Led technical design discussions, mentored engineers, and drove end-to-end feature development, contributing to architecture decisions, system reliability, and platform scalability for enterprise-grade applications.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, Clojure

Backend: Node.js, Express.js, Nest.js, TypeScript

Frontend: React.js, ClojureScript (Re-frame)

Databases: MongoDB, PostgreSQL, MySQL, Redis, Elasticsearch, ClickHouse

Infrastructure: Docker, Kubernetes, AWS, Jenkins, GitLab

Architecture: Microservices, Event-Driven Systems, REST APIs, GraphQL

Data Systems: Kafka, CDC Pipelines, Real-time Analytics

Testing: Jest, Mocha, Chai, Unit testing.

Security: Jwt, OWASP API security, OAuth2

Observability: Cloudwatch, Grafana, Prometheus, Logging, Monitoring

PROFESSIONAL EXPERIENCE

► Pidge Technologies, Gurugram

Aug'25 - Apr'26

Senior Software Engineer

- Scaled a real-time logistics platform handling trip lifecycle processing for 100K+ daily orders, ensuring high availability and low latency.
- Led development of a distributed Incentive System from scratch, improving user engagement and operational efficiency using NestJS, Kafka, Docker, ClickHouse, MongoDB.
- Architected and implemented a CDC-based data pipeline (PostgreSQL → Kafka → ClickHouse) using Python, enabling near real-time analytics at scale.
- Developing a test automation framework using Python and Test APIs.
- Improved system performance through event-driven architecture, batching strategies, and backend optimizations.
- Extensive experience in developing scripts for build, deployment, maintenance, and related tasks using Jenkins and Docker.

- Used Docker services for deployment and testing of micro services.
- Experienced in MongoDB database design including Indexing and Sharding, with proficiency in RDBMS (MySQL, Oracle) and Big Data technologies

► Stem Inc, Gurugram

Aug'23 - Apr' 25

Senior Software Engineer

- Developed and scaled the Athena Platform for managing energy storage assets in wholesale energy markets.
- Led data ingestion, transformation, and validation pipelines, ensuring high-quality, reliable data for analytics and backend processing.
- Designed and maintained microservices-based backend systems using Node.js and AWS, improving scalability and maintainability.
- Worked on Python Open stack API's, used Python scripts to update content in the database and manipulate files.
- Implemented AWS cloud solutions, including EC2 for computation, S3 for storage, RDS for database services, and Lambda for serverless operations, enabling smooth orchestration of microservices using Python scripts.
- Developed RESTful APIs using Python, MongoDB, Redis, and PostgreSQL, enabling seamless data management and integration.
- Monitored function execution, errors, and logs using AWS Cloud Watch for proactive issue resolution.

► PT Zenius Education, Indonesia

Mar'20 - Aug' 23

Senior Software Engineer

- Contributed to building Zenius Apps & LMS, a high-scale education platform serving millions of students.
- **Scaled platform from 10K → 100K DAU** and supported **5M+ users**, ensuring system performance under high load
- Designed and implemented scalable leaderboards and personalized learning systems, improving engagement and retention.
- Built and enhanced distributed microservices architecture using Node.js, Kafka, Docker, Kubernetes, Redis, MongoDB, PostgreSQL, AWS.
- Utilized MERN stack and JSON for server-side scripting, integrating MongoDB for flexible data storage, supporting 10+ relational and NoSQL databases, and **improving application scalability by 40%**.
- Improved performance through query optimization, caching strategies, and asynchronous processing.
- Leveraged Kafka for event-driven processing and Elasticsearch for search optimization.
- Implemented cron jobs and background workers for large-scale data processing

► Haldor Topsoe A/S, New Delhi

Nov'17 - Aug'19

Software Engineer

- Developed TrueTemp, a Single Page Application (SPA) for analytical and graphical temperature analysis of industrial plant systems.
- Led frontend development using ClojureScript (Re-frame), building a highly interactive and scalable UI.
- Implemented subscription-based access control, enabling feature access based on user plans.
- Designed and built data visualization systems for real-time analytics.
- Integrated backend services and MongoDB, ensuring efficient data handling.
- Deployed and managed applications on Azure App Service

EDUCATION

- **B.Tech. (Computer Science)** from B.I.E.T, Jhansi in **2017** with **77.9%**
- **12th** from Agra Public School (**AISSCE**) (**CBSE**), Agra in **2013** with **85.6%**
- **10th** from Air Force School (**CISCE**) (**CBSE**), Agra in **2011** with **10 CGPA**

ACHIEVEMENTS

- Served as Secretary of Computer Science Student Council at B.I.E.T. Jhansi
- Gold medalist in N.C.C. (National Cadet Corps) Certificate "A"
